

YOUR REVENUE CYCLE MANAGEMENT

PLAYBOOK

SIX ESSENTIAL STEPS
**FOR A STRONG
YEAR-END FINISH**

6 CONCRETE STEPS YOUR TEAM CAN TAKE THIS QUARTER

Run an RCM performance health check: Denial rate, clean claim % first-pass, days in AR, net collection rate, self-pay bad debt.

Map your front-end patient access workflow: Registration → eligibility → prior authorization → cost estimate → patient financial counseling.

Audit your technology stack: Which tasks are still manual or repetitive? What automation tools or AI modules could you deploy?

Update your patient financial engagement strategy: Evaluate how effectively you communicate patient responsibility and payment plan offerings.

Schedule payer contract review & scenario modeling: Run scenarios for reimbursement cuts, increased self-pay exposure, or shifting payer mix.

Set 2026 goals and KPIs: Reduce AR aging by X%, increase first-pass clean claim rate to Y%, reduce self-pay bad debt by Z%.

START 2026 WITH **MOMENTUM**

Partner with Revco Solutions to streamline your revenue cycle, strengthen collections, and recover lost revenue for the new year ahead.
